

The 2nd Vietnam High Energy Physics Meeting

“High Energy Physics: Frontiers and Interfaces”

 IOP, VAST, Ha Noi

 Nov. 25 - 27, 2026

<https://hoivl-nlc-vn.github.io/hepvnconf2026>

“dedicated to the advanced frontiers of high energy physics while fostering interdisciplinary collaborations at its interfaces with neighboring fields. As particle physics enters an era driven by precision measurements, high-luminosity accelerators, multi-messenger astronomy, advanced computing, and artificial intelligence, addressing fundamental questions about the Universe increasingly requires close interaction across traditional disciplinary boundaries.”

- Mathematical physics
- Quantum field theory & the Standard Model,
- Physics beyond the Standard Model
- CP violation and flavor physics
- Neutrino physics & flavor oscillations
- Collider physics & advanced detector technology

Organizing institutions

- Division of High Energy Physics Society (V-HEPS), Vietnam Physics Society
- International Center of Physics, IOP, VAST, Hanoi, Viet Nam

Advisory committee

- Patrick Aurenche (LAPTH, Annecy)
- Pierre Darriulat (VNSC, VAST, Hanoi)
- Dao Tien Khoa (INST, Hanoi)
- Tran Thanh Van (Rencontres du Vietnam, Orsay & Quy Nhon)

Conference chairs

- Ha Huy Bang (VNU, Hanoi), co-chair,
- Nguyen Anh Ky (IOP, VAST, Hanoi), chair

- Gravitational theory & approaches to quantum gravity.
- Dark matter, dark energy, & quantum aspects of the cosmos.
- Early universe cosmology, inflation, & quantum initial conditions.
- Black holes, spacetime structure, & gravitational wave physics.
- Astroparticle physics & high-energy cosmic phenomena.
- Quantum information science & quantum technologies.

Abstract submission: 10 Oct. 2026 (Sat.)

Registration for participation: 02 Nov. 2026 (Thu.)

Financial support request: 15 Oct. 2026 (Thu.)

Contact: Dr. Nguyen Anh Ky, IOP, VAST email: hoivl.nlc.vn@gmail.com
